Whittlesea is about 20km north of Melbourne’s CBD. It has had rapid population growth since 2002, and this is set to continue. It has a younger than average age profile (20% are under 14 years old), and a high level of cultural diversity (44.5% speak a language other than English at home).

Unemployment is above average, and there are very high levels of mortgage and rental stress. Whittlesea residents are the least likely to visit green space each week, are ranked second for sleeping less than seven hours a night and commute times are high (long commute time is associated with a range of negative health effects. Poor self-reported health is the fourth highest in the State and the rate of GP attendance is the second highest. The proportion of Whittlesea residents accessing professional support for mental health issues (10.4%) is lower than the state average (12.4%).

Of our 14 LGAs in the North & West AOD Partnership, Whittlesea has the highest percentage of 15-17 year olds who drank alcohol in the past 30 days (69.8% compared to a state average of 24.7%), the highest percentage of 15-17 year olds who sniffed glue or chromed (17.2% compared to a state average of 7.8%) and the second highest percentage of 15-17 year olds who smoked tobacco in the last 30 days (28.8% compared to a state average of 12.9%). Family violence incidence is also among the top 3 highest rates for our whole catchment (12.5 per 1000 population).

The rate of pharmacies, allied health services and GPs per 1000 of the population is ranked within the bottom ten of the State. As a measure of service distribution, this may mean people find it difficult to access the health services they need.

Population projections

This graph shows Whittlesea’s projected population growth rate is much higher than average to 2031.

High levels of population growth require strategic planning and management strategies to ensure that service provision and community infrastructure continues to meet community need.

Aligned planning priorities

The City of Whittlesea Health and Wellbeing Plan has seven future directions 1) inclusive and engaged community; 2), accessibility in, out and around our city – which includes a focus on access to health services, including mental health services, and particularly for young people; 3) growing our economy; 4) places and spaces to connect people; 5) health and wellbeing – including to address smoking rates and harmful use of alcohol; 6) living sustainably and 7) good corporate governance.

The Northern Melbourne Medicare Local has a focus on systems reform, supporting planning, integrations and coordination of primary health care services across four key areas – including mental health and service access and quality. NMML will lead planning; integration and coordination of primary health are services for people with a mental illness. Under service access and quality, NMML supports the active integration of after-hours pilot of ReGen AoD service and NPACER program and is funding a joint police and mental health clinical project to provide dual secondary response.

The Hume/Whittlesea Primary Care Partnership identifies four priority areas 1) Integrated design and delivery in key health and wellbeing areas including mental health; 2) responsiveness and effectiveness supporting organisations to better meet future growth demands; 3) collaboration, evidence and innovation and 4) consumer involvement and 5) prevention in practice. Throughout the plan there is a strong focus on support and identifying opportunities for improved service integration and collaboration.
